

Newborn Photo session

-The perfect age?

The best time for shooting your precious baby is between 10-21 days from birth. Sessions run smooth and babies are easier to pose and curl up into those adorable positions during this time. After that, they become too alert

- What is my baby is older than 21 days?

We still can do the session for babies that are younger than 60 days. And your little one will still be very cute and beautiful. However, we will be a bit limited with some poses because after 20th day from birth will become uncomfortable, as baby's physiology is changing very fast.

But it is still possible and will allow us to get gorgeous images

- What if my baby wouldn't sleep during the session?

Yes, babies do cry and fuss, and that is normal! I have a lot of experience and technics to calm your precious one down and make him/her sleep. We usually use a combination of feeding, calming, soothing and cleaning (yes naked babies poop!) and photographing in between as long as it is needed. That is why enough of extra time is included for the newborn session.

- How do I prepare my little one?

- Make sure you do not to eat any spicy or irritating foods the day of the shooting if you are breastfeeding
- Have a pacifier at hand if your baby uses one.
- For bottle-fed babies, have a bottle ready and handy so we can feed them mid-pose to keep them calm and relaxed
- Please don't dress baby before coming. Just put on diaper and wrap in blanket

- Baby's acne and peely skin should I Reschedule?

Baby's acne and peely skin appear onevery baby that's ever been born and it is very temporary!

My lighting will minimize this issue.

Also I am highly skilled in the area of newborn skin editing so this isn't reason to worry

- Do you sanitise the baby's props?

Of course! All items are sanitised in between newborn sessions . I used to be a nurse in the hospital and worked with premature newborns, so I do always keep your baby's safety and comfort in mind. We disinfect all props before newborn session

- My elder kid doesn't want to take photos...

The most difficult age for a photographer is 12-36 months and the older the kids get the fewer problems the photographer faces.

But we know how to work with small ones and after each session all kids get a surprise.

This is really helps to motivate kids for family portraits.

- What we have to wear?

- It's very important to wear proper clothes for whole family
 - Plain colors are the best!
 - Please avoid any prints, patterns and logos!
 - The best for mum a dress or blouse soft colours
- The best for Daddy is Shirts (long or short sleeves) white, beige or blue colours
 - black polo for Daddy would be also great for some poses
 - Tips for siblings: boys wear shirts and girls dress (try to avoid bright colors)

- Is make up necessary for the mom?

- I use only high-quality professional equipment to achieve the best result. Well, it won't hurt to have a light make up. But, usually, clean and properly broomed hair and neat nails are enough

- Why we have to choose you?

- I use only high-quality professional equipment to achieve the best result
- I'm a seasoned professional with years of experience. I have invested a lot into my training, working with skilled photographers.
- Proven success story. Lots of happy customers in past years
- I have lots of props that are provided for photoshooting for free of charge and you get quite a variety of choices

Why do we need to come to your studio?

- Because there is professional lighting, already pre-set for the optimal shots
- Our studio is located at Ampang area with free parking space available
- Wide selection of props, hats, headbands, bowties, blankets, baskets, etc to choose from. So we can select those that fit your baby best.
- Backdrops and settings for some extra nice shots
- Save us all a lot of time, because everything is already there and stage is set

Our priority is safety, all poses are comfortable and safe for babies
